RESEARCH INTERESTS

I am interested in building resource-efficient, data-centric, and human-centered machine learning systems.
Focus Areas: LLMs, Foundation Models, {Multi/Cross-modal, Continual, Active, Federated} Learning, Limited Supervision
Applications: Wearable Intelligence (inertial, acoustic, and health sensing), Ubiquitous Computing, Human Activity Recognition

EDUCATION

The University of Texas at Austin, Austin, TX — Aug 2023 – Present
***Ph.D.**, Electrical and Computer Engineering, **GPA:** 3.875/4.00*
Advisors: Prof. Edison Thomaz, Prof. Joydeep Ghosh

Anna University (SSN College of Engineering), Chennai, India — 2013 – 2017
***B.Tech.**, Information Technology*

SELECTED PUBLICATIONS [Conference/Journal/Workshop]

* denotes equal contribution and joint lead authorship *[Citations: 287, h-index: 10, i-index: 10]*

Conference/Journal/Workshop

- E Farahmand, RR Azghan, NT Chatrudi, E Kim, Gautham Krishna Gudur, E Thomaz, G Pedrielli, P Turaga, H Ghasemzadeh. AttenGluco: Multimodal Transformer-Based Blood Glucose Forecasting on AI-READI Dataset, **IEEE EMBC 2025**.

RESEARCH AND WORK EXPERIENCE

The University of Texas at Austin – Graduate Research Assistant Austin, TX
Advisors: Prof. Edison Thomaz, Prof. Joydeep Ghosh Aug 2023 – Present

- Designed data-efficient continual learning methods to mitigate catastrophic forgetting in multi-sensor wearable human activity recognition (HAR) systems and multimodal cross-population blood glucose prediction.
- Reduced labeling costs up to 3000x using dataset distillation as an alternative to active learning for audio classification.
- Developed multimodal acoustic-motion feature alignment methods to enhance audio-based HAR.
- Proposed SVFT (Singular Vector guided Fine-Tuning) – a Pareto-optimal PEFT technique *[Mentor: Prof. Sujay Sanghavi]*.
- Enhanced uncertainty-aware Chain-of-Thought reasoning in LLMs *[Mentor: Prof. Ying Ding]*.

The University of Texas at Austin – Graduate Teaching Assistant Austin, TX
Primary Instructors: Prof. Joydeep Ghosh, Prof. Edison Thomaz Jan 2025 – May 2025

- Designing and grading assignments for the *Deep Learning (taught by Prof. Joydeep Ghosh* with ~50 students) and the *Human Signals* course (taught by *Prof. Edison Thomaz*) (full-time and part-time offerings) with ~80 students.
- Mentoring students on presentations, final research projects, paper reviews, and paper presentations.

Nokia Bell Labs – Research Intern Cambridge, UK
Mentors: Soumyajit Chatterjee, Mohammad Malekzadeh, Fahim Kawsar May 2025 – Aug 2025

- Improving foundation models for health-sensing tasks in the Device Intelligence team.

Independent Research Dec 2018 – May 2023

- Analyzed the effect of calibration on prioritizing important samples during training *[Mentor: Prof. Emtiyaz Khan, RIKEN]*.
- Designed zero-shot federated learning frameworks to handle new heterogeneous classes and models for audio sensing.
- Worked on Bayesian active learning for on-device human activity recognition (HAR) and wearable sensing tasks.

Ericsson R&D, Global AI Accelerator (GAIA) – Data Scientist III Chennai, India
Mentors: Shrihari Vasudevan, M J Prasath Feb 2019 – Apr 2023

- Worked on ML for network intelligence and telecom, leading to multiple publications, patents, and AI-driven solutions.
- Contributed to 3GPP standardization for federated learning and multi-vendor model sharing; defined and positioned Ericsson's AI-Native design principles. Created spatiotemporal models for indoor building connectivity prediction with <5% error; enhanced mobility prediction of user devices in 5G Network Data Analytics Function (NWDAF).
- Developed E-ADF – an end-to-end unsupervised anomaly detection framework with data-efficient Bayesian model selection and dynamic threshold optimization with >60% reduction in data points.
- Created E-LangHub (Ericsson LLM Hub) with telco-rich data and SOTA models. Improved AIB (Automated Intelligent Knowledge Base) for customer symptoms using LLMs and active learning; worked on telco-specific language translation.
- Deployed an object detection system for infrastructure failures at cell sites, reducing field technician hours by over 20.

SmartCardia (EPFL) – Machine Learning Engineer Chennai, India
Mentor: Srinivasan Murali May 2018 – Nov 2018

- Implemented gradient-boosted ensembles and LSTM models for regression and classification on imbalanced time-series wearable clinical data; engineered biomarker-driven features (sleep apnea, troponin, blood pressure, hemoglobin).

Solarillion Foundation – Research Assistant Chennai, India
Mentor: Vineeth Vijayaraghavan Feb 2016 – May 2018

- Led the development of *HARNet* – deep ensemble models for activity recognition with on-device incremental learning.
- Designed dynamic gesture recognition models with efficient feature engineering on a low-cost Raspberry Pi Zero ($5).
- Deployed a movie occupancy predictor for a top Indian multiplex chain using tree-based models and branched LSTMs.

SSN College of Engineering – Undergraduate Student Researcher Chennai, India
Mentors: Prof. Bhalaji N, Prof. Srinivasan R Feb 2015 – Mar 2017

- Developed a vision-based intelligent bus stop recognition system using CNNs; employed data augmentation and active learning strategies to ensure scalability and adaptability in dynamic Indian environments, achieving ~96% accuracy.
- Led an HCI research project – Neurocinematics, to classify real-time cognitive responses of film viewers using EEG data.
- Evaluated routing protocol performance metrics on a Contiki testbed to select the optimal mote for two IoT scenarios.

PATENTS

- Federated Learning using Heterogeneous Labels, WO2022013879A1.
- Distributed Machine Learning with New Labels using Heterogeneous Label Distribution, WO2022162677A1.
- Method and Apparatus for Approach Recommendation with Threshold Optimization in Unsupervised Anomaly Detection, WO2023166515A1.

HONORS AND AWARDS

- SVFT was selected for an *oral presentation* at the WANT workshop at ICML 2024.
- Graduate Ph.D. Fellowship from the Cockrell School of Engineering at The University of Texas at Austin
- Top 1 percentile in HackerRank in the Algorithms Domain – Problem Solving (Advanced)
- Full financial registration grants to attend ICLR 2021, NeurIPS 2020, and OxML 2020
- *AIB* won Ericsson's Top Performance Competition 2020 in the Operational Excellence category
- Undergraduate research grant of INR 25,000 from SSN College of Engineering
- Winner of the GermEval Shared Task 1 Challenge (Subtask (a)), KONVENS 2019 in the post-evaluation phase
- Certification of Merit for Grade A1 in all subjects in AISSE (CBSE 10th boards)

TECHNICAL SKILLS

Programming Languages: Python, C++, HTML/CSS, Bash, SQL, JavaScript
Tools: Git, LaTeX, Docker, GCP, Arduino, Raspberry Pi
Libraries & Frameworks: PyTorch, TensorFlow, Hugging Face Transformers, Keras, Numpy, Pandas, Scikit-learn, PySpark

SUMMER SCHOOLS

- 5th Summer School on Artificial Intelligence 2021, Indian Institute of Information Technology (IIIT) Hyderabad (Virtual)
- Eastern European Machine Learning Summer Schools – both EEML 2020 and EEML 2021 (Virtual)
  Presented ActiveHARNet (EEML '20); zero-shot federated learning and task-independent continual learning (EEML '21)
- Oxford Machine Learning Summer School, OxML 2020 (Virtual)

PROFESSIONAL SERVICE

- **Program Committee/Reviewer:** UbiComp/ISWC 2025, ACM ICMI 2025, ICASSP 2025, ICML 2024 – ES-FoMo workshop, ICLR 2021 – DPML workshop, NeurIPS – ML4H 2020 and ML4H 2019 workshops, KONVENS 2019 – GermEval
- Mentored 11+ students in embedded ML assignments and research projects at Solarillion Foundation (Feb '17 - May '18).
- Technical Reviewer of the book titled "Hands-On Meta Learning With Python"
- Event Organizer of "Data Nuggets" – a Data Science contest at Invente 2016, SSN College of Engineering

POSTERS AND EXTENDED ABSTRACTS

- Uncertainty-Aware Chain-of-Thought Reasoning in Large Language Models, AI in Health – Course Project.
- Adaptive Federated Learning in Conceptually Drifting Environments, Applied Machine Learning – Course Project.
- Heterogeneous Zero-Shot Federated Learning with New Classes for On-Device Audio Classification, **MobiUK 2021**.
- Bayesian Active Learning for Wearable and Mobile Health, **NeurIPS** Europe meetup on Bayesian Deep Learning **(BDL 2020)**.
- Handling Real-time Unlabeled Data in Activity Recognition using Deep Bayesian Active Learning and Data Programming, **MobiUK 2019**, University of Oxford.
- Neurocinematics: The Intelligent Review System, 3rd International Conference on Cognition, Brain and Computation (**CBC 2015**), Indian Institute of Technology (IIT) Gandhinagar.

SELECTED TALKS

- Resource-efficient Machine Learning – SSN College of Engineering (2022)
- Heterogeneous Zero-Shot Federated Learning with New Classes for On-Device Audio Classification – MobiUK 2021
- Telecom-Specific Language Translation using GCP – Ericsson/Google Cloud Day (2021)
- Resource-Constrained Machine Learning for Ubiquitous Computing Applications – Flipped by GAIUS (2020)

TECHNICAL COURSEWORK AND MOOCs

- **Relevant Coursework**
  Advanced CV, Generative Models in ML, Statistical Methods I & II, Applied ML, Spoken Language Technologies, AI in Health, Human Signals: Sensing/Analytics, ML on Real World Networks, Fine-Tuning Open-Source LLMs
- HackerRank | Problem Solving – Advanced, Intermediate, Basic
- University of Washington | Coursera – Machine Learning Specialization (4 courses) –
  A Case Study Approach, Regression, Classification, Clustering & Retrieval
- Stanford University | Coursera – Machine Learning
- UC San Diego | Coursera – Algorithmic Toolbox, Data Structures
- John Hopkins University | Coursera – R Programming
- Stanford University – CS231n
